SUMMARY OF JULY WATER QUALITY SAMPLING

Sampling for July 2017 occurred on the fifth and was considered a base flow collection. Water samples were collected at all ten locations, in addition to discharge measurements being conducted, with the exception of LDB-1, LT-1, URC-2, WC-1 and JB-1. Discharge was not measured at these locations as a result of low water levels. Mesonet data for Norman shows 0.95 inches of precipitation occurring in the 72 hours prior to sampling, no precipitation occurring on the fifth, and 0.03 inches of precipitation in the 72 hours after the sampling event. The total rainfall amount in Norman for the month of July was 2.43 inches. All water level gages were operational for the month.

Table 3 QA/QC Data Where Subscript 1 Denotes a Level 3 RPD

Quality assurance/quality control (QA/QC) of the data includes a field blank and duplicate sample from each collection event, and is qualified by the OWRB. Relative Percent Difference (RPD) of the duplicate sample can be categorized into four levels, where Level 1 likely has no QA issues and Level 4 has major QA issues, and should be used with caution.
